AI & GENERATIVE AI CAPABILITIES

Certifications: Databricks Certified Data Engineer Associate (March 2026) · Oracle OCI Generative AI Professional (July 2024) · AWS Certified Developer – Associate DVA-C02 (May 2024)

Hands-on Experience: LLM integration (Gemma) · Generative AI app development · OCR & Document AI (Oracle OCI) · ML pipelines · AI-assisted development (Codium / Claude Code) · ETL & Data Engineering (Apache Spark / Databricks)

SKILLS

Languages: Java, JavaScript, Python, C/C++, C#, TypeScript, PHP
Frameworks: React, Next.js, Angular, Node.js, Django, Flask, Tailwind CSS, jQuery, Selenium
Cloud & Data: AWS (Lambda, EC2, S3), Oracle OCI, Databricks, Apache Spark, MongoDB, PostgreSQL, MySQL
DevOps & Tools: Docker, CI/CD, Git, Splunk, REST APIs, Agile/Scrum, Test Automation, Postman, Linux, Jira

WORK EXPERIENCE

Paycom

Irving, TX

Software Developer

April 2025 – February 2026

- Built a **customizable employee data dashboard** scaling from 15 → 50 configurable columns with persistent user preferences, sort controls, and bulk CSV export; applied **SQL indexes** to optimize query performance across thousands of employee records
- Led **legacy-to-React migration** of a multi-section form, implementing **full CRUD functionality** via REST APIs and **React useReducer** for cross-section state management
- Automated 15 end-to-end **Selenium / C# test scenarios** for time-punch workflows across environments; the tests were adopted by teammates and scheduled in **weekly CI/CD regression runs**
- Delivered features across **PHP, React, MySQL, and Docker** in a high-availability production environment; used **Splunk** for root-cause analysis and **AI coding tools (Codium)** to accelerate delivery
- Contributed to a **cross-functional, multi-team project**; implemented UI permission and filter changes and represented team in weekly stakeholder meetings

TradeSun

Del Mar, CA (Remote)

Software Engineering Intern

September 2024 – December 2024

- Designed an **AI/ML document processing pipeline** using **Oracle OCI Document Understanding** to extract structured key-value data from scanned financial documents via **OCR and machine learning**
- Built a **JSON Rules Engine** in an **Angular** SPA enabling business logic changes without redeployment

Cogent IBS

Franklin, MI (Remote)

Full Stack Developer Intern

June 2024 – August 2024

- Developed **REST APIs** for a cloud delivery kitchen platform using **Next.js and MongoDB** with **Stripe** payment integration; drove a **22% increase in sales** and **18% reduction in cart abandonment**
- Implemented persistent **cart state management** via local storage and rebuilt the client **landing page** with a responsive layout in collaboration with the design team

PROJECTS

Food Bank AI Inventory & Recipe Generator [GenAI] Python · Gemma LLM · React · Team Project

- Co-built a web app integrating the **Gemma large language model (LLM)** to auto-generate meal-box recipes from food bank inventory; owned the **React frontend** and gained hands-on experience with **generative AI integration** in a collaborative team setting

Apartment Lease Management Portal Django · React · PostgreSQL · Docker · REST API

- Full-stack lease platform with smart lock control and guest access; implemented **token-based authentication**, optimized **Django ORM** queries, containerized with **Docker**

EDUCATION

San Francisco State University

B.S. in Computer Science

San Francisco, CA

December 2022
