SKILLS and CERTIFICATIONS

Databricks Certified Data Engineer Associate – Databricks	March 2026
Oracle Cloud Infrastructure 2024 Generative AI Certified Professional – Oracle	July 2024
AWS Certified Developer – Associate DVA-C02 – Amazon Web Services	May 2024

Programming Languages:	Java, JavaScript, Python, C/C++, C#, TypeScript, PHP
Frameworks and Libraries:	Django, Spring Boot, React, Node.js, Tailwind CSS
Databases:	MySQL, PostgreSQL, MongoDB, SQLite, SQL
Tools:	AWS, Jira, Postman, Splunk, Linux, Docker, Databricks

WORK EXPERIENCE

Paycom	Irving, TX
<i>Software Developer</i>	<i>April 2025 - February 2026</i>
- Developed and maintained enterprise payroll and workforce management features using PHP and C# in a high-availability production environment - Enhanced UI responsiveness using React and jQuery, resulting in improved user experience for employee time-tracking workflows - Utilized Splunk for log monitoring and production debugging, accelerating root cause analysis and issue resolution - Supported containerized deployments using Docker, improving consistency across different environments - Optimized MySQL queries and database interactions, supporting high-volume employee time tracking transactions	
TradeSun	Del Mar, CA (Remote)
<i>Software Engineering Intern</i>	<i>September 2024 - December 2024</i>
- Developed custom AI models using machine learning and OCR to extract data from scanned financial documents - Implemented Amazon Cognito hosted UI into a Flask dashboard to streamline user authentication and authorization - Integrated a JSON Rules Engine into an Angular application, enabling dynamic rule-based decision-making workflow	
Cogent IBS	Franklin, MI (Remote)
<i>Full Stack Developer Intern</i>	<i>June 2024 – August 2024</i>
- Implemented over 15 REST API routes to handle customer orders using Stripe, resulting in a 22% increase in sales - Optimized a successful cart-to-purchase workflow, resulting in a decrease of cart abandonment by 18% - Designed a responsive UI using React State Management, ensuring a seamless user experience across devices	
iD Tech Camps	Campbell, CA (Remote)
<i>Programming Instructor</i>	<i>October 2020 – August 2022</i>
- Conducted interactive online sessions via Zoom, instructing courses in C++, Java, Python, and HTML to students - Offered video conference support to students encountering difficulties during sessions, resolving issues and errors promptly and effectively, resulting in a 30% reduction in session disruptions. - Demonstrated coding techniques and best practices, helping students develop better coding practices and solve errors	

EDUCATION

San Francisco State University	San Francisco, CA
<i>BS in Computer Science</i>	<i>Graduation Date: December 2022</i>
De Anza College	Cupertino, CA
<i>AS in Computer Science, AA in Liberal Arts</i>	<i>Graduation Date: August 2020</i>

PROJECTS

Apartment Lease Management Portal Platform	<i>Django, React, PostgreSQL, Docker</i>
- Developed a lease management portal to streamline leasing, smart lock control, complaints and guest access - Designed and optimized Django ORM and PostgreSQL database schema for efficient data storage and retrieval - Implemented REST API principles and token-based authentication for secure, stateless communication with frontend	
Personal Finance Tracker	<i>Django, React, Tailwind CSS, PostgreSQL, Chart.js, Docker</i>
- Leveraged Django RESTful APIs to handle user authentication, data storage, and expense tracking functionalities - Designed a responsive frontend with React and Tailwind CSS, integrating Chart.js for dynamic data visualization - Configured PostgreSQL for efficient data management and optimized ORM queries for enhanced performance
